15, 20 and 30 Amp
125, 250 and 277 Volt

Turnlok® – 3P4W Plugs and Connectors

20 and 30 Amp
125/250 and 3 Ø 250 Volts,
3 Ø 480 Volt, 3 Ø 600 Volt

Turnlok® – Non-NEMA

20 and 30 Amp
125/250 and
3 Ø Y 120/208 Volt

Bulk Portable Cord

16/3, 14/3, 12/3, 10/3, 12/4
10/4 SEOW/STOW
50, 100 and 1000 foot lengths

Cord Drops

16/3, 14/3, 12/3, 10/3, 12/4
10/4 SEOW/STOW
1 to 99 foot lengths

protection that goes well beyond the surface

The SteriGuard line of Pass & Seymour® wiring devices store antimicrobial growth inhibitors directly inside the products themselves. The additives are gradually released to the surface, providing continuous, long-lasting protection against the growth of bacteria, molds, mildews and fungi.

All SteriGuard products meet strict NSF certification standards for public health protection and pass JIS Z2801 testing standards for reducing up to 99.99% of these surface bacteria:

- Escherichia (E. coli)
- Listeria monocytogenes
- Staphylococcus (Staph)
- Salmonella
